

PALM INFOTECH

More Than Quality, It's Our Signature

Your custom tech experience creator is just a nudge away.

Text-first, selectable edition of the Palm Infotech overview. The content has been reformatted into a clean reading order for easier copying, searching, and text extraction.

At a Glance

At Palm Infotech, we do not just build apps; we help shape digital experiences. The team listens closely to ideas, adds clarity with expertise, and addresses challenges upfront to deliver products built for today and ready for tomorrow.

Approach: Every project is driven by structure, discipline, and ownership. Palm Infotech does not simply deliver what is asked; it guides, advises, and leads projects with the client's long-term success in mind.

Founded: April 2021

Started in April 2021 with a mission to connect people and create meaningful digital experiences.

40+ Professionals

A skilled team of designers, developers, and creators building user-focused digital solutions.

120+ Apps Delivered

Developer: Support bug fixes.

Quality Assurance: Confirm bug-free build.

Team Lead / Project Manager: Manage communication and ensure clarity.

Launch

Business Analyst: Confirm final requirements.

Designer: Provide final design assets.

Developer: Prepare deployment build.

Quality Assurance: Final regression testing.

Team Lead / Project Manager: Handle app store submissions and updates.

Competitive Edge

1. Structure and Discipline

Every project is treated with the same rigor, ensuring consistent quality and delivery standards across engagements.

2. Ownership Mindset

The team owns its work, not just the code. Every line of code and design decision is made with the client's success in mind.

3. Proactive Risk Management

Risks are flagged early, better approaches are suggested, and long-term goals are kept in sight to prevent costly surprises.

4. Balanced Expertise

Client vision is balanced with technical expertise so solutions are both creative and practical, meeting real-world needs.

5. Trust Through Transparency

Trust is built on clarity, consistency, and complete delivery, with honest communication and no hidden surprises.

Portfolio Highlights

Palm Infotech has built 120+ apps in four years across industries and geographies. Recent project highlights include:

- A lifestyle and loyalty-driven food and beverage app featuring ordering, rewards, wallet functionality, gamification, and a store locator.
- An adaptive IBS-FODMAP app that personalizes the diet journey, combining expert guidance and smart testing to help users understand what they can eat with confidence.
- A fantasy sports app with real-time match integration, leaderboards, and wallet withdrawals.
- A dating and social experience app designed for real-life meetups, event creation, and authentic connections.
- A financial super app in Myanmar, continuously enhanced since 2021.
- A platform for discovering projects and startups shared by founders and teams, enabling users to connect, collaborate, and explore relevant opportunities.
- An app that combines ancient Vedic wisdom with AI to interpret palm and planetary influences for self-reflection, balance, and spiritual growth.
- Wonder App: a real-time, location- and interest-based social app for chat, meetups, ratings, feedback, and verified interactions.
- A sales management app for managing teams, orders, and performance in real time; tracking progress; collaborating instantly; and improving productivity anywhere.
